BRIEF ABSTRACT OF LETTER

Submits for sanction a rough project amounting to Rs 75,370/- for water supply to Seringapatam as called for in 4·0 no 5040-3/ mL 147-15-15 dt 5th February 1917

NOTES AND ORDERS

K

On 4·0 no 5040-3/ mL 147-15-15 dt the 5th February 1917, the Chief Engineer was requested to submit detailed plans and estimates for closing the Karanjes, the Cost being met from State Funds

Norms—First Sheet

G R. S. 12]
General and Revenue Secretariat

mt File No. 159 -[19]

Serial No

(2) It is not clear whether this order contemplated the submission of plans and estimates for water-supply to Vizagapatam town or not clear

(3) The Chief Engineer has submitted a project for water supply to Vizagapatam town amounting to Rs 75370/- . The maintenance charges come to Rs 1200/- Ganjam is excluded

(4) The G.O. of the 5th February 1917, promises some help from State Funds towards a drainage scheme only and not water supply as stated by the Chief Engineer

(5) The financial condition of the municipality as per budget estimates of 1917-18 is as follows

| | Rs |
|---|---|
| Opening balance | 7,433 |
| Receipts | 9,265 |
| Total | 16,698 |
| Expenditure | 12,220 |
| Closing balance | 4,478 |

(6) It is a point for consideration whether the metal cost of the project as well as its maintenance after it is completed is to be borne entirely from State Funds

(7) Submitted for orders

(8) Please put up a draft reply stating

Public Works Secretariat,

No. 1962 Dated Camp Holenarsipur, 16th February 1918.

From

S. Cadambi, Esquire, B A , L C E ,

Chief Engineer for Irrigation,

B a n g a l o r e.

To

The Secretary to Government,

Revenue Department

Sir,

With reference to Government Order No 5040-3-Mul/47-15-15 dated 5th February 1917, regarding the improvement to Seringapatam Town, I have the honour to forward herewith, for administrative sanction, a rough project amounting to Rs 75,370/- for Water Supply to Seringapatam The report accompanying the estimate explains the details

2 The cost of the scheme has to be met by State Funds as laid down in the Government Order referred to above.

3 The Central Sanitary Board to whom the project was referred, are of opinion, that in case of Seringapatam, the drainage scheme should go hand in hand with the Water Supply project I agree with them in their opinion

4 The estimate for the drainage is almost ready and will be submitted to Government, soon, for orders In the meanwhile, administrative sanction may be accorded to the rough project for Water Supply, so that the detailed estimates may be prepared

5 A copy of the resolution of the Central Sanitary Board is enclosed for kind information.

I have the honour to be,

Sir,

Your most obedient servant,

Chief Engineer for Irrigation

SANITARY DIVISION. M... P W.D

Preliminary report to accompany the rough estimate for water supply xx of -- Seringapatam Town

Reference

Government Order No. 5040-3/M L -- 147-15-15 dated 5-2-1917 and Chief Engineer's No 2026 of 23-2-1917

REPORT

The ill health of Seringapatam is - chiefly attributed to its people drinkin water from the Baranjis which are fed by a duct taken off from the Sangaradoddi - anicut

2. Government in their order noted --- above ordered that the cost of a pure -- drinking water supply to the town and -- the cost of closing the Baranjis should be borne out of the State funds and called for early submission of an estimate

3. The present proposal is to lift --- water from the river by means of a Hydra Hydraulic Ram to a Service Reservoir l - located near the flagstaff, which is the highest part of the town and distribute therefrom

4. The present population of Seringapatam with Ganjam is 6,000 and of Seringapatam proper i.e. the Fort, it is 2600 only In 1901, its population was 1300 The town can never recover its old ---- strength The prospective population

is assumed as 8,000 only The daily allowance per head is 12½ gallons and the total daily discharge through pipes is - 100,000 gallons

5. At present the ram and the rising - main will be made sufficiently big to -- supply both Ganjam and Seringapatam but the Service Reservoir and the Distribution will be designed to supply the prospective population of Seringapatam only which is assumed as 3,000

6 The Ram will be located at the point B near the 79th mile stone of Bangalore Mysore road and the feed water will be - led to it in a closed masonry conduit -- A B a distance of 6,100 feet

7 The crest of anicut is 86 16 and the minimum water level is maintained at ~~84 00~~ 84 00 by the existing rough stone anicut which has been thrown across the river about - ½ a mile further up The conduit will - be constructed with a gradient of 1/3000 and will be able to discharge 1.90 cusecs the required quantity The feed water - conduit ends in a small cistern from --- which the water is let into the ram by - means of 9" Cast Iron pipes 30 feet ~~long~~ as bought.

8 The R L. of ram is 68 00 The water level in the feed water cistern is 82 00 The head available for working the ram - is 14 feet

9. The waste water is discharged into the river through stone ware pipes at -- point C near the road bridge above its - F.L

10. The rising main BD is 4,500 feet -- long and is of 6" Cast Iron pipes The water will be stored in a service reservoir D after passing through sand -- filters, the aggregate area of which --- will be 1,225 Sqr feet The capacity - of the Reservoir is 37,500 gallons or a day's supply for 3,000 people at 12½ gallons per head

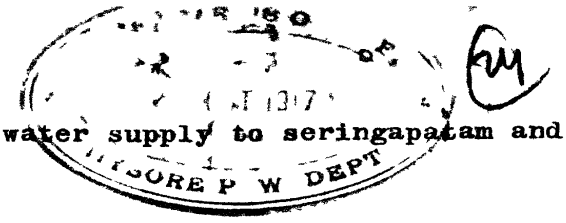
11. The distribution system is roughly marked in the plan and consists of cast iron and ~~wrought~~ Cast iron pipes supplying -- fountains

12. The total cost of the scheme is -- ₹ ~~75,000/-~~ 75370 to be met wholly by Government The annual maintenance is ₹ 1200 The Municipality should consider if they are at least able to meet this expense - every year

13 Detailed plans and estimate will -- ~~xxx~~ follow, if these proposals are approved

Executive Engineer,
Sanitary Division

Bangalore,
12-7-1917



Calculation sheet for water supply to seringapatam and - anjam

The population of seringapatam including Ganjam 6,126

Prospective population 8,000.

Daily allowance per head per day 12½ gallons.

Total daily consumption 100,000 gallons per day or 70 gal lons per minute.

The loss of head in a 6" pipe discharging 70 gallons per minute = .0026' foot per yard

The distance of the Service Reservoir from the position - of the ram is 1,483 yards

The loss of head by friction = 4'

Static head = (152 00 - 68 00) = 85'

Add for incrustation, bends &c , 11'

Total head lost 100'

Head available for working the ram (82 - 68) = 14'

Water required to work the ram $= \frac{100,000 \times 100}{936 \times 14} = 763$ -- gallons per minute

Size of feed water pipe

To discharge 763 gallons per minute it is proposed to use 18" stone ware pipes from the anicut to the ram, a distance of 6,100 feet at a gradient of 1/3000 The head lost during --- transmit is 0.5'

Taking 84 as the lowest water level in the river, the --- water level in the feed water cistern A may be assumed to be - 82.00

Service Reservoir

The capacity of the reservoir to supply Seringapatam only taking its prospective population in the near future at 8,000, is 8000 x 12½ gallons = 87,500 gallons a day or 6,000 cft -- taking the depth of the ~~river~~ Reservoir as 15' the area will be 400 s f

F I L T E R S.

Assuming 2 millions gallons per acre per day as the rate of filteration permissible in sand filters and allowing 50% spare area required, the area required is $\frac{37,500}{2 \times 10} \times \frac{3}{2}$ acres or 122.5 sft

Executive Engineer,
Sanitary Division

K.V./3

Ent 81 9157 V

PROCEEDINGS OF THE CENTRAL SANITARY BOARD IN MYSORE

R e a d -

Letter No 669 dated the 31st October 1917, from the Chief Engineer for Irrigation, forwarding a project for water supply to the Seringapatam town by pumping water from the river by means of a hydraulic ram to a service reservoir located in the highest part of the town and distributing therefrom, the estimated outlay being ₹75370 and the annual maintenance charges, Rs 1,200

.. ... .... .... .

Resolution No 11 dated 15th January 1918.

Resolved that the proposed scheme be approved and that lifting the water by hydraulic ram be recommended The Board consider that, in the case of Seringapatam town, a drainage scheme should go hand in hand with a water supply project and that the effect of piped water supply alone without drainage will be to render the town more malarious than ever before.

2 The daily allowance of water per head per day proposed in the estimate may be reduced from 12½ to 10 gallons

The Chief Engineer of Mysore

SW

With reference to your letter no 1962 of the 14th February 1918 submitting plans and estimates amounting to Rs 75370/- for water supply to Seringapatam, I am directed to state that in G O no 5040-3/no 147-15-15 of the 5th February 1917 referred to by you only the closing of the Karanjas was at an estimated cost of Rs 15000/- approved by govt and that

P T O over

plans and estimates were called for in this respect. There was no direction about the preparation and submission of projects for water supply to the town. I am therefore further to enquire what arrangements are under consideration for the closing of the Karanjis. The estimates due should be sent without delay.

The several reminders issued from this office referred to the same work, and in your letter No. 12461 dated 24/11/17, also, it was intimated that the estimates for the said work were yet due from the Exec. Engr.

The plans and estimates received with your letter under reply are herewith returned.

I have etc

Place on the table & lasting thanks Submit for general Mtg

SIR,

With reference to your letter No.4814/Rl.159-17-2 dated the 26th February 1918, requesting to be informed as to why an estimate for water supply to Srirangapatam town was forwarded when the estimate for closing of the Paranjis was approved by Government and plans and estimates were called for by Government, I have the honour to inform you that as the water supply to the town at present depends entirely on the Paranjis and the work of closing of the Paranjis has to be undertaken after an efficient water supply is assured, the Executive Engineer, Sanitary Division, was requested to submit estimates for both the works. That officer submitted the estimate for water supply to the town He has been reminded to expedite the submission of the estimate for closing of the Paranjis. It will be submitted to Government on receipt.

I have the honour to be,

S i r,

Your most obedient servant,

R V Sundaram

For Chief Engineer for Irrigation.

Secretary to Government, Revenue Department,

Bangalore.

SIR,

With reference to your letter No.4814/Rl.159-17-2 dated 26th February 1918 and in continuation of this office No.4504 dated 6th April 1918, regarding the closing of Karanjees in the town of Seringapatam, I have the honour to forward herewith, for favour of sanction, an estimate amounting to Rs.2,627/- for the above work.

2. From a perusal of the report accompanying the estimate, it will be seen that it is proposed to fill up the Karanjees in the inhabited areas. If the work is undertaken before the water supply scheme, the people will have to go to the river for water.

3. An estimate, amounting to Rs.75,370/-, for water supply to Seringapatam was submitted with this office No.1962 dated 14th February 1918.

I have the honour to be,

Sir,

Your most obedient servant,

Chief Engineer for Irrigation

Sir.

I am directed to invite ~~your~~ attention to Govt order no 5040-3/ml 147-15-15 dt 5th February 1917, requiring the Seringapatam municipal Council to make serious attempts to ~~introduce~~ improvement in their finances and to enquire whether ~~any~~ action if any has been taken in this direction and ~~if so, to~~ what

O T over

extends the present position to

I am also to point out that an estimate for about Rs 75,000 for Watersupply to Seringapatam has been received from the Executive Engineer and unless there is an assurance that the municipal Council are able to bear the entire maintenance charges, which are estimated at cost Rs 1200/- per annum, the consideration of the question of sanctioning the scheme is not likely to be taken up. Considered

I am therefore to request you to kindly submit the views of the municipal Council on the matter at a very early date

The plans and estimates are forwarded herewith for reference and return
